

Are you affected by STROKE or BRAIN INJURY?

Join us for our upcoming Educational Workshop :

Your Vision Post Acquired Brain Injury

With Dr. Joelle Greenaway, Optometrist

Thursday, March 14th 2019

1:30-3:00 pm

Downtown Nanaimo Library, 90 Commercial Street

Ever wondered why and how a brain injury can affect your vision? In this workshop we will review what the visual system is and what parts of the brain are involved as well as what happens in an assessment and how it is different from a “regular eye exam.” We will also discuss what the possible treatment options are and who should be involved in your recovery.

Dr. Joelle Greenaway graduated from the Pennsylvania College of Optometry and has completed courses in Pediatrics/Binocular Vision/ TBI and Vision Therapy. After moving to Vancouver Island, she began working for FYiDoctors in Nanaimo, Ladysmith, and French Creek. After seeing patients of all ages in need of vision therapy without a local practitioner to see, she decided to pursue her fellowship with the College of Optometrists in Vision Development and become Board Certified in Vision Therapy. Outside of the clinic, you will find her on outdoor adventures with her husband, two young sons and dog.

For people with acquired brain injury/stroke and family caregivers.

No Charge. Space is limited. Please call or email to reserve your seat.
